Web Design

Responsive web site design on popular content management systems

ABOUT US

THE
ULTIMATE ON-PAGE
SEO CHECKLIST

✓ Create a catchy title.

✓ Write a clear URL containing target keywords.

✓ Make your meta description informative and succinct.

✓ Use your target keywords within the first 100-150 words. Use semantically related concepts throughout the rest.

✓ Structure your text by using H1 to H6 subheadings in a descending order.

✓ Spice up your content with videos, GIFs and pictures that can keep people interested.

✓ Find the optimal text length. Make the text easy to read and understand.

✓ Enrich your text with internal links to helpful related webpages on your site and around the web.

✓ Provide your reader with social sharing buttons.

✓ Make every piece of your content unique. Avoid duplications.

✓ Make sure Google's crawling bot can reach your article.

✓ Test how long it takes for your page to be ready. Even milliseconds matter sometimes.

✓ Make the page mobile-friendly, so your audience can read it everywhere.
